

Async Research Assistant

CLI and deployment

Nural · Emil · Mahammadali · Bailar

AI-ENG-110 / Topic 4 / 17 September 2026

Command-line interface

ask **demo** **bench**

Offline mode needs no API keys.

JSON output keeps numbered citations and fetch timings.

Invalid input returns a short error without a traceback.

43 CLI + AI smoke tests passed

94% CLI coverage in the full suite

Docker and CI

Python 3.12.6 in two stages

The runtime uses a non-root account with writable outputs.
CI checks lint, types, coverage and the Docker build.
Container smoke tests disable networking.

Verification still needed

Docker build/run and team fixes for existing lint/type errors

Questions and discussion

How does --no-cache avoid database access?

Why do CLI tests replace Researcher with a fake?

What remains before the team release?

Bailar / CLI, deployment and assembly
